Generation 2015

A lightweight wheelchair
with growth adjustability

Simba™

Generation 2015

Innovative and adjustable,
the wheelchair with
growth capabilities

One thing we're certain of is
that kids will grow! That's why the
Simba features 40 mm of depth
growth built right into the frame. The
20 mm width growth capability works
also without additional parts.

The Simba – your loyal friend!

6 upholstery colours

A DESIGN THAT'S FIT FOR KIDS

With independence comes confidence. Every centimeter of the Simba was designed to give kids the best possible wheel access for efficient propulsion. With features such as the abduction frame, flip-up angle adjustable footrest and safari wheel lock integrated into side guard, kids are able to independently access the wheels, transfer in and out of the wheelchair, and access the wheel locks without interference during propulsion.

IT'S ALL ABOUT ERGONOMICS

The push bar can be easily adjusted in angle and height for an enhanced ergonomic position. The new stabilizer reinforces the backrest especially when push handles are chosen.

THE CONVINCING SAFARI WHEEL LOCK

With its improved handling the updated safari side guard wheel lock let you stop quickly and safely.

COLOURFUL OPTIONS

We want the Simba to be an expression of your child's unique personality. Aside from its super stylish frame, the Simba also offers 22 bright frame colours, 6 different upholstery colours, coloured castor forks and a full range of stylish spoke guards.

A FULLY ADJUSTABLE AXLE ADAPTER

The optimised axle adapter offers full adjustability of the rear seat height, centre of gravity and camber without compromising on any performance.

SIMBA – AN INNOVATIVE DESIGN

The outstanding design of the new castor link tube, combined with the innovative carbotechnology forks that are made from extremely lightweight stiff high-tech material, makes the wheelchair just that little bit lighter.
