

| R10

**PUSH SMARTER, NOT HARDER,
WITH EVERY STEP.**

QUICK
INSTALLATION
GUIDE

E | R10

The power assist device designed specifically to support the caregivers.

LIGHTWEIGHT

At just under 6.9 kgs, the R10 is one of the lightest power assists on the market.

PERFORMANCE

No compromise on performance. The R10 achieves a 12 km range, climbs up to 8° slopes, and handles a max user weight of 130 kg.

RELIABILITY

A solid, long lasting tire, lithium-ion battery, and a 3 year motor warranty promising quality and reliability.

TURN SLOPES FLAT AND HEAVY LOADS WEIGHTLESS.

Inclines can be especially challenging for wheelchair attendants. But with the R10's **Constant Speed Assistance** mode, you can get a continuous speed at the press of a button – even when tackling inclines of up to 8 degrees!

THERE'S NO NEED TO PRESS A BUTTON.

Upon detecting motion, **Automatic Assistance** provides just the right amount of propulsion to match your pace, reducing the effort needed to push. The faster you walk, the more assistance you receive. Plus, because you're only supplied power when you need it, your battery lasts longer too.

DISTANCE DETECTION SENSOR.

The R10's distance detection sensor automatically pauses the device if it doesn't detect an attendant gripping the push handle. This ensures the wheelchair only moves when someone is in control, adding an extra layer of safety for both you and the wheelchair user.

Compatible with almost all common manual wheelchairs with the following dimensions:

Box frame or similar frame type with round tubes diameter: 20 - 28 mm.

Seat width: 380 - 520 mm

Rear seat height: 400 - 580 mm

Height between the box frame and the ground: 180 - 220mm

Quick Release of Control Unit

Ensures easy and safe transport without disconnecting cables.

Modern Back Pack

Compact and easy transport adapts to nearly any wheelchair.

Simple Attachment and Removal

Attaches easily for docking via small pin. Low added weight & simple design.

Easy & Convenient Folding

The R10 can remain in place when folded.

Simple Control

Thumb throttle and three push-button speed settings.

R10 Specifications

Weight Capacity	130 kg
Range*	up to 12 km
Max Slope	8°
Weight (including battery)	6.9 kg
Weight (battery pack)	1.2 kg
Adjustable Max Speed	1.5 kmh
	3.0 kmh
	4.5 kmh
Motor	250 Watt 36V / 15 Amp Brushless Motor
	Lithium Ion 5 Ah / 36 V
Battery	
Charging Time	Approx. 2.5 - 3 hours
Wheel Size	6"
Modes	Automatic Assistance Constant Speed (Cruise Control)
	3 year Motor 2 year Battery
Warranty
