The Ride Designs Custom Range

Ride Designs Custom 2

Ride Designs Custom 2 Cushion & Ride Designs Custom Back with Mesh Liner

- Excellent postural support and effective pressure relief utilising a firm custom contoured design.
- Greater pressure relief with the RIDE Contour when combined with the Custom 2's Closed-cell foam cushion. At risk areas are fully offloaded, safely loading areas that are more tolerant for high postural support.
- Maximum postural control for a precise fit from the RIDE Custom 2 firm back surface.
- Perfect for active users aiming to maximise pushing efficiency by delivering superior stability compared to softer foam seats.
- Suitable for clients who struggle with temperature regulation and are prone to heat and moisture build-up, by promoting a higher level of airflow verses other special seating, keeping clients cooler and dryer.
- Suitable for clients who have historically been issued Mould Seating Interfaces (MSIs).

Ride Designs Custom AccuSoft

Ride Designs Custom AccuSoft Cushion & Ride Designs Custom Back with AccuSoft Foam Liner

- Enhanced comfort with precise postural support through the open-cell Accusoft foam. Accusoft offers a plush, forgiving feel that conforms to the client.
- Ideal for clients needing postural support combined and pressure relief while maintaining a high level of comfort.
- Well-suited for multiple carer environments, where carers/clients may be less aware of ideal seating posture and benefit from the forgiving nature of softer foam.
- Perfect for clients who have previously used foam-carved seating systems.
