QS 7x

/GO FURTHER. FOLD SMALLER.

QS SERIES

SPINERGY

QUICKIE QS7 X

REDEFINING ULTRA-LIGHTWEIGHT FOLDING PERFORMANCE

For four decades, the QUICKIE portfolio has been **defined by innovative technology** that sets our products apart. The QS7 X brings our best innovations together in **one premium folding wheelchair.**

Precise and effortless folding of the QS5 X, the frame technology and ride performance of the QS7 R, and the unique folding front frame from the RGK FX range.

The result is a chair that lifts lighter, rides easier and folds smaller.

Scan the QR code to see the QS7 X Visualiser!

LIGHTEST FOR LIFTING

FROM 6.7 KG TRANSPORT WEIGHT

How do you build a ready to ride folding wheelchair at just 6.7kg and still deliver outstanding rigidity? It starts with advanced materials and the engineering expertise that defines QUICKIE.

The difference is something you feel instantly, making every fold, every lift and every transfer effortless.

NEED AN EVEN LIGHTER CHAIR?

Achieve the lightest configuration possible with our Pro frame option, a fixed welded backrest and centre of gravity position removes adjustment to deliver an even lighter package.

This brings your chair down to 6.4kg, only 400g heavier than a QUICKIE QS7 R.

AEROSPACE-GRADE MATERIAL

Built from **7000 series aluminium**, our highest grade frame material available for active manual chairs. A proven technology that is currently used on the QUICKIE QS7 R, it is the lightest material choice for any active chair.

OVALISED TUBE DESIGN

Patented oval tubing further increases frame stiffness while using less material than conventional round tubes; saving on weight without compromising on the quality or strength of the chair. The oval shape also prevents components from rotating, reducing moving parts and ensuring a more precise, responsive ride.

CARBON CASTORS

You can equip your QS7 X with super light carbon castor wheels, further reducing the overall weight of your chair.

TRANSPORT

EFFORTLESS TRANSPORT, EVERY TIME

The QS7 X ditches the bulky ‘box frame’ of conventional folding chairs for an open frame design that’s lighter, more compact, and easier to lift independently.

The unique **FreeFold™** technology delivers smooth, low-effort folding with optimised kinematics for fluid, controlled handling. Consistent wheel camber keeps the chair **stable and upright** when folded, so your hands stay free for smooth and simple transfers

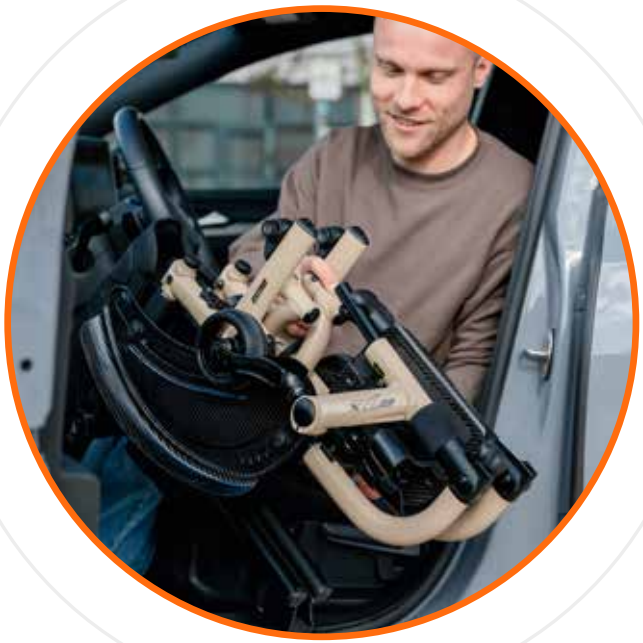
Fold-n-Lock keeps the chair securely closed with one simple click, stopping the chair unfolding during lifting and transfers.

INNOVATIVE FRONT FOLD

FITS IN SPACES WHERE OTHERS DON'T

Inspired by the RGK FX range, our innovative **FrontFold™** frame takes folding to another level.

In one smooth motion, the front of the chair folds neatly underneath the seat canvas, further reducing the folded package for easier transfers and storage.



DESIGNED FOR EASIER TRANSPORT

FrontFold™ was created with transport in mind. Space will be at a premium whether you're catching a taxi with friends, heading off on holiday, or completing an independent car transfer; the QS7 X is considerably easier to fold, lift and store.

ROLLING PERFORMANCE

MAKING EVERY PUSH COUNT

Folding shouldn't mean settling for sub-standard rolling efficiency.

The QS7 X's frame is made from **7000 series aluminium,** with ovalised tubing and a hollow forged castor housing, maximising stiffness and rigidity. Every ounce of your energy is then translated into forward motion, not lost in the flex of the frame.

The redesigned cross brace is tucked seamlessly inside the seat rails which completely locks the frame when unfolded, further reducing movement and delivering a planted feel and responsive ride.

RE-DESIGNED CROSS BRACE

The **re-designed cross brace** positions the seat rails seamlessly inside the frame. This fully locks out the frame to minimise any flex, which increases the overall pushing efficiency and tucks the folding mechanism away to create a clean and open aesthetic that you would historically only find on a rigid chair.

TAILORED CASTOR GEOMETRY

The castor to rear wheel relationship is key to efficiency. Whatever your configuration, we tailor each setup so that it is optimised to your frame angle and inset for smoother handling and efficient propulsion.

FIXED FRONT

Our lightest adjustable aluminium folding wheelchair, with an open frame design that makes car transfers unbelievably simple. It's fully adjustable for a truly personalised setup.

FRONT-FOLD

Front-Fold technology delivers an ultra-compact transport package, making independent transfers easier and allowing the chair to be stored in even the smallest spaces.

QS7 X-SERIES

A SERIES OF HIGH-PERFORMING FOLDING WHEELCHAIRS

There is a QS7 X just for you. You're spoilt for choice with 4 frame versions unlocking the ideal chair set up for your daily life.

HYBRID

Built for strength and performance, the reinforced hybrid frame delivers exceptional rigidity, supports users up to 140kg and is ideal for use with power assist devices.

PRO

The pro frame is designed for users who know exactly the set-up they want, it delivers exceptional strength, durability and weight savings in one precision-built package via a fully welded backrest and axle stems.

SMART OPTIONS

MADE FOR EVERYDAY LIFE

NEW CARBON SIDEGUARDS

Longer shaped carbon sideguards, for better positioning and protection.

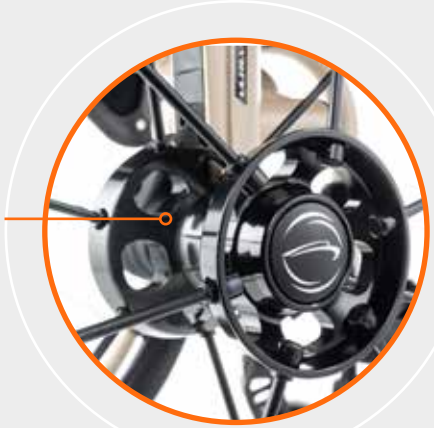
LED LIGHTS

Integrated LED lights blend seamlessly into the QS7 X design.

Three modes, high, low, and blink, improve visibility so you can see and be seen. Easily detachable for recharging.

TITANIUM AXLE PIN

Newly re-designed titanium lightweight axle pin saves 90g compared to the standard.



OMOBIC WHEEL LOCK

New compact aluminium brake from Omobic with smooth, easy operation, also suitable for reduced hand strength. The ergonomic grip and ribbed surface improve handling and stability.

OMOBIC HANDRIMS

Choose between the OMOBIC Airy handrim, featuring an ultra lightweight ergonomic design with anti-slip silicone insert for confident propulsion – even in wet conditions, or the OMOBIC Flow handrim, with its ergonomic contoured profile and full anti-slip coating, optimal for reduced hand function.

NEW JAY LITE PRO

Introducing the new JAY Lite Pro. Weighing in at only 900g, this ultra lightweight cushion has a 2” standard height which is perfect for active users and has medium to high pressure relieving capabilities for all day use.

MODERN DESIGN

MADE PERSONAL

With its open frame styling, new cross brace design, and minimal visible hardware, **the QS7 X looks sleek and modern** from every angle.

Now it is up to you to give it your own personal touch:

- Choice of 22 colours for both frame and handrim
- Upholstery trim colours
- Anodised or powder-coated castor fork options
- Anodised or powder-coated wheel options
- Frame graphics

Empulse

Empower your QS7 X

The QS7 X is the perfect companion for any power assist device, especially the hybrid frame.

CREATE YOUR OWN QS7 X

WITH THE 3D VISUALISER

Want to see how your QS7 X chair will look and what it will weigh? Scan the QR code and build your dreams in the **new 3D Visualiser.**

TECHNICAL DATA	QS7 X
Max. user weight	QS7 X FF - 110kg, QS7 X Hybrid - 140kg (136kg with crash test option)
Seat width	320 - 500mm (in 20mm steps)
Seat depth	340 - 500mm
Front seat height	400 - 560mm
Rear seat height	370 - 500mm
Backrest height	250 - 475mm
Backrest angle	from -15 to +13 / 75°-103°
Total width	SW +180/240/270mm at 0°,2°,4° camber and 25" wheels The total width can exceed 800mm in certain configurations.
Total length	1150mm
Total height	1050mm
Max. pivot width	760mm
Max. safe slope for use of parking brakes	7°
Frame versions	Fixed Front, Hybrid, Pro
Frame angle	FF 80°/88°/92° (100°/92°/88° EU)
Front wheel	3“, 4", 5", 6", 7“
Rear wheel	24", 25"
Wheelchair weight	Fixed Front: from 9.3kg, Pro from 8.9kg
Dismanteled weight	Fixed Front: from 6.7kg, Pro from 6.4kg
Mass of heaviest part	2,1kg
Removable parts	Rear wheels (for transportation)
Frame colours	22 colours
Crash tested	Yes (approved for transport in a vehicle according ISO 7176-19:2022)
Transport without user	Fix the wheelchair firmly and securely in the vehicle (e.g. car or plane)
Intended use and environment	For people unable to walk and with limited mobility; inside and outside. Operation by user or assistant.
