QUICKIE
Live without limits.

QS 7R

MORE ENERGY. MORE MOTION.
MORE COMPACT.

QS SERIES

QUICKIE QS7 R

UNEXPECTEDLY COMPACT. UNMISTAKABLY RIGID.

Built on the Red Dot Award-winning design of the QUICKIE Nitrum, the NEW QUICKIE QS7 R combines an ultra-lightweight frame and premium rolling efficiency, now with our innovative **FrontFold™** technology. For users who demand performance and transportability, QUICKIE have changed how a rigid wheelchair travels without compromise.

Wrapped in the same sleek, minimalist design language that earned the Nitrum international recognition, the QS7 R proves that exceptional engineering and exceptional design go hand in hand.

Less effort. More life. That's the thinking behind the New QUICKIE QS7 R.

TRUSTED PERFORMANCE

ENGINEERED FOR MAXIMUM PROPULSION EFFICIENCY

Every push should move you further with less effort.
The QS7 R transforms more of your energy into forward motion, delivering the responsive, efficient ride ambitious riders demand.

Starting at **just 4.9 kg transport weight**, the QS7 R is the lightest in its class. Every gram has a purpose: to maximise efficiency, minimise effort and leave more energy for life.

Specially processed **7000 series aerospace-grade aluminum** with an exceptional strength-to-weight ratio is heat-treated after welding to create a lighter, stronger frame without compromising on durability.

Patented oval tubing further increases frame stiffness while using less material than conventional round tubes. The oval shape also prevents components from rotating, reducing moving parts and ensuring a more precise, responsive ride.

ONE-PIECE WELDED FRAME

Unlike clamped castor links or cross-tubes, which add weight and absorb energy through vibration, the QS7 R integrates them into one complete welded frame for a stiffer, lighter and more efficient ride.

LIGHTWEIGHT. STRONG. EFFICIENT.

The **strengthened, patented three-way adjustable castors** fine-tune angle, tracking and height for precise control, stable tracking and confident front-end stability. This improves robustness, simplifies field service and delivers outstanding manoeuvrability with less correction and fatigue.

The result is an **exceptionally lightweight yet remarkably strong** wheelchair that transfers more of your energy into forward motion – so every push takes less effort.

UNEXPECTEDLY COMPACT

THE ONLY ADJUSTABLE RIGID WHEELCHAIR WITH A FOLDING OPTION

Rigid wheelchairs are renowned for their lightweight efficiency, rigidity and responsive ride. But transporting them has traditionally required extra space.

Utilising proven **FrontFold™** technology first introduced on the RGK FX & QS7 X, the QS7 R is the only adjustable rigid wheelchair that can be fitted with optional **FrontFold™**, folding into an unexpectdly compact package by collapsing the front frame beneath the seat while preserving the stiffness and responsiveness of a premium rigid wheelchair.

DESIGNED FOR EASIER TRANSPORT

With or without **FrontFold™**, the QS7 R is engineered for more comfortable handling, helping reduce shoulder strain during daily lifting. Its lightweight, compact design makes lifting easy, while the open frame underside allows you to lift the chair closer to your body

UNIQUE TWIST-LOCK FOLDING BACKREST

With one hand, simply grab the (optional) Twist-Lock backrest bar and twist it to release, fold and load the QS7 R into your car. With double-locking, you can also use the same bar to lift the chair. It'll also lock without removing your sideguards or low-profile cushion too.

PUSH-BAR FOLD BACKREST

This push-bar provides a simple-to-use, quick-release folding mechanism. Just pull the bar upwards to un-lock and fold. Incredibly robust, it won't loosen over time. Available with double-locking, you can also fold the back with sideguards and a low profile cushions still on your wheelchair.

ERGONOMIC GRAB BARS

The QS7 R has two ergonomic grab bars (complete with rubber grip pads) on the backrest and cross-tube for lifting. Helping you to grip and balance your wheelchair, it'll also reduce the strain on your wrists (particularly during repetitive daily-lifting).

EASY CAR TRANSFERS WITH AN OPEN-FRAME DESIGN

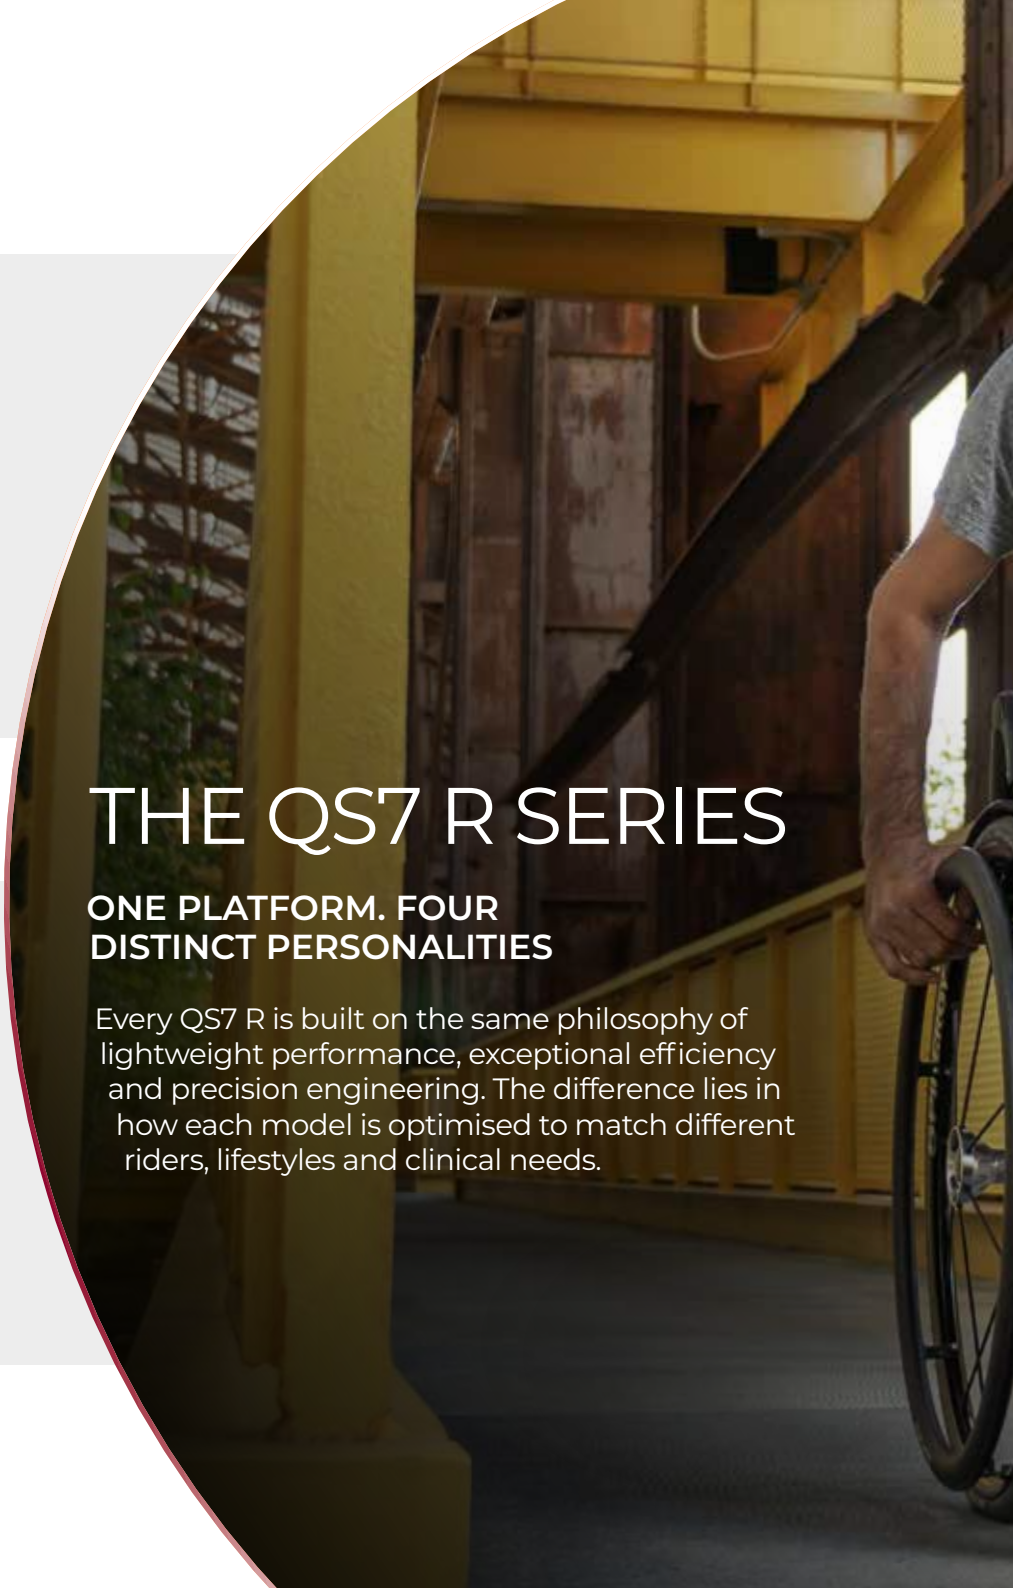
Clean and minimalistic, once the rear wheels are removed, the underneath of the frame is completely open, so it can be easily lifted across (and closer to) your body when getting in-and-out of a car. The short axle tube and folding back help to save extra space.

OPEN FRAME

Minimal Weight. Maximum Freedom.
Our lightest adjustable aluminium rigid wheelchair. Featuring a clean open-frame design for easy, independent car transfers.

FrontFold™

The Most Compact.
FrontFold™ technology delivers an ultra-compact transport package, making independent transfers even easier and allowing the chair to be stored in even the smallest spaces.



THE QS7 R SERIES

ONE PLATFORM. FOUR DISTINCT PERSONALITIES

Every QS7 R is built on the same philosophy of lightweight performance, exceptional efficiency and precision engineering. The difference lies in how each model is optimised to match different riders, lifestyles and clinical needs.

HYBRID FRAME

Built For Strength.
Two additional frame tubes are welded onto the castor arms, providing increased stiffness, rigidity and durability for the most demanding users. Perfect for use with powered add on devices, it also raises the maximum user weight to 140kg.

PRO FRAME

Pure performance.
The Pro option features a welded backrest and welded axle stems to reduce weight, maximise rigidity and minimise moving parts – ideal for experienced riders who know exactly how they want their wheelchair configured.

ACHIEVE A PERFECT SETUP

A PRECISION FIT – NOW EVEN SIMPLER

Outstanding performance begins with an outstanding fit.

With one of the industry's most configurable rigid wheelchair platforms, the QS7 R can be tailored to match almost any rider.

Multiple frame angles, frame insets, seat heights and backrest options enable clinicians to **optimise positioning, comfort and propulsion efficiency** for every individual.

Full compatibility with JAY® cushions and backrests, Empulse power assist devices, and a wide range of accessories ensures your wheelchair can be configured for virtually any lifestyle.

Because when your wheelchair fits perfectly, every push becomes more efficient.

1. 3 Frame Angles: 88, 92 or 100°
2. 3 Frame Insets: 0, 1 or 3 cm
3. 2 Frame Lengths: (long/short)
4. 90 Seat Width/Depth combinations
5. Lower Leg Length selection
6. Optimised Castor House positions (preset)
7. Optimised Frame Heights (preset)

TAILORED CASTOR GEOMETRY

The castor to rear wheel relationship is key to efficiency. This is why each setup is optimised to your frame angle and inset for smoother handling and efficient propulsion.

MORE WAYS TO PERSONALISE

CONFIGURE IT YOUR WAY

OMOBIC HANDRIMS

Choose between the OMOBIC Airy handrim, featuring an ultra lightweight ergonomic design with anti-slip silicone insert for confident propulsion – even in wet conditions, or the OMOBIC Flow handrim, with its ergonomic contoured profile and full anti-slip coating, optimal for reduced hand function.

LED LIGHTS

Improve your visibility in low-light conditions while adding a sleek, futuristic look. Discreetly integrated into the castor link tubes, they feature a durable, water- and shock-resistant design with a removable Li-Ion battery for easy charging.

OMOBIC WHEEL LOCK

New compact aluminium brake from Omobic with smooth, easy operation, also suitable for reduced hand strength. The ergonomic grip and ribbed surface improve handling and stability.

TWIST-LOCK BACKREST

The Twist-Lock backrest release enables easy one-handed folding in a single movement. The refined mechanism reduces cable slack for smoother, more precise operation.

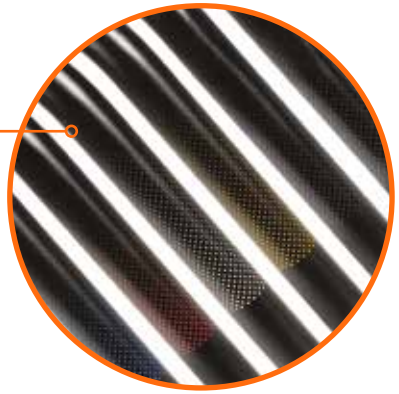
MODERN DESIGN

EXPRESS YOUR STYLE

A wheelchair should reflect your personality as well as your performance. The QS7 R combines purposeful engineering with clean, contemporary styling.

With **22 frame and handrim colours**, accent options and countless configuration options, you can create a QS7 R that's unmistakably yours.

Optional **frame graphics Floating Dots** add a distinctive finishing touch.



Castor Forks and 24" **Lightweight Wheels** in different colours available.

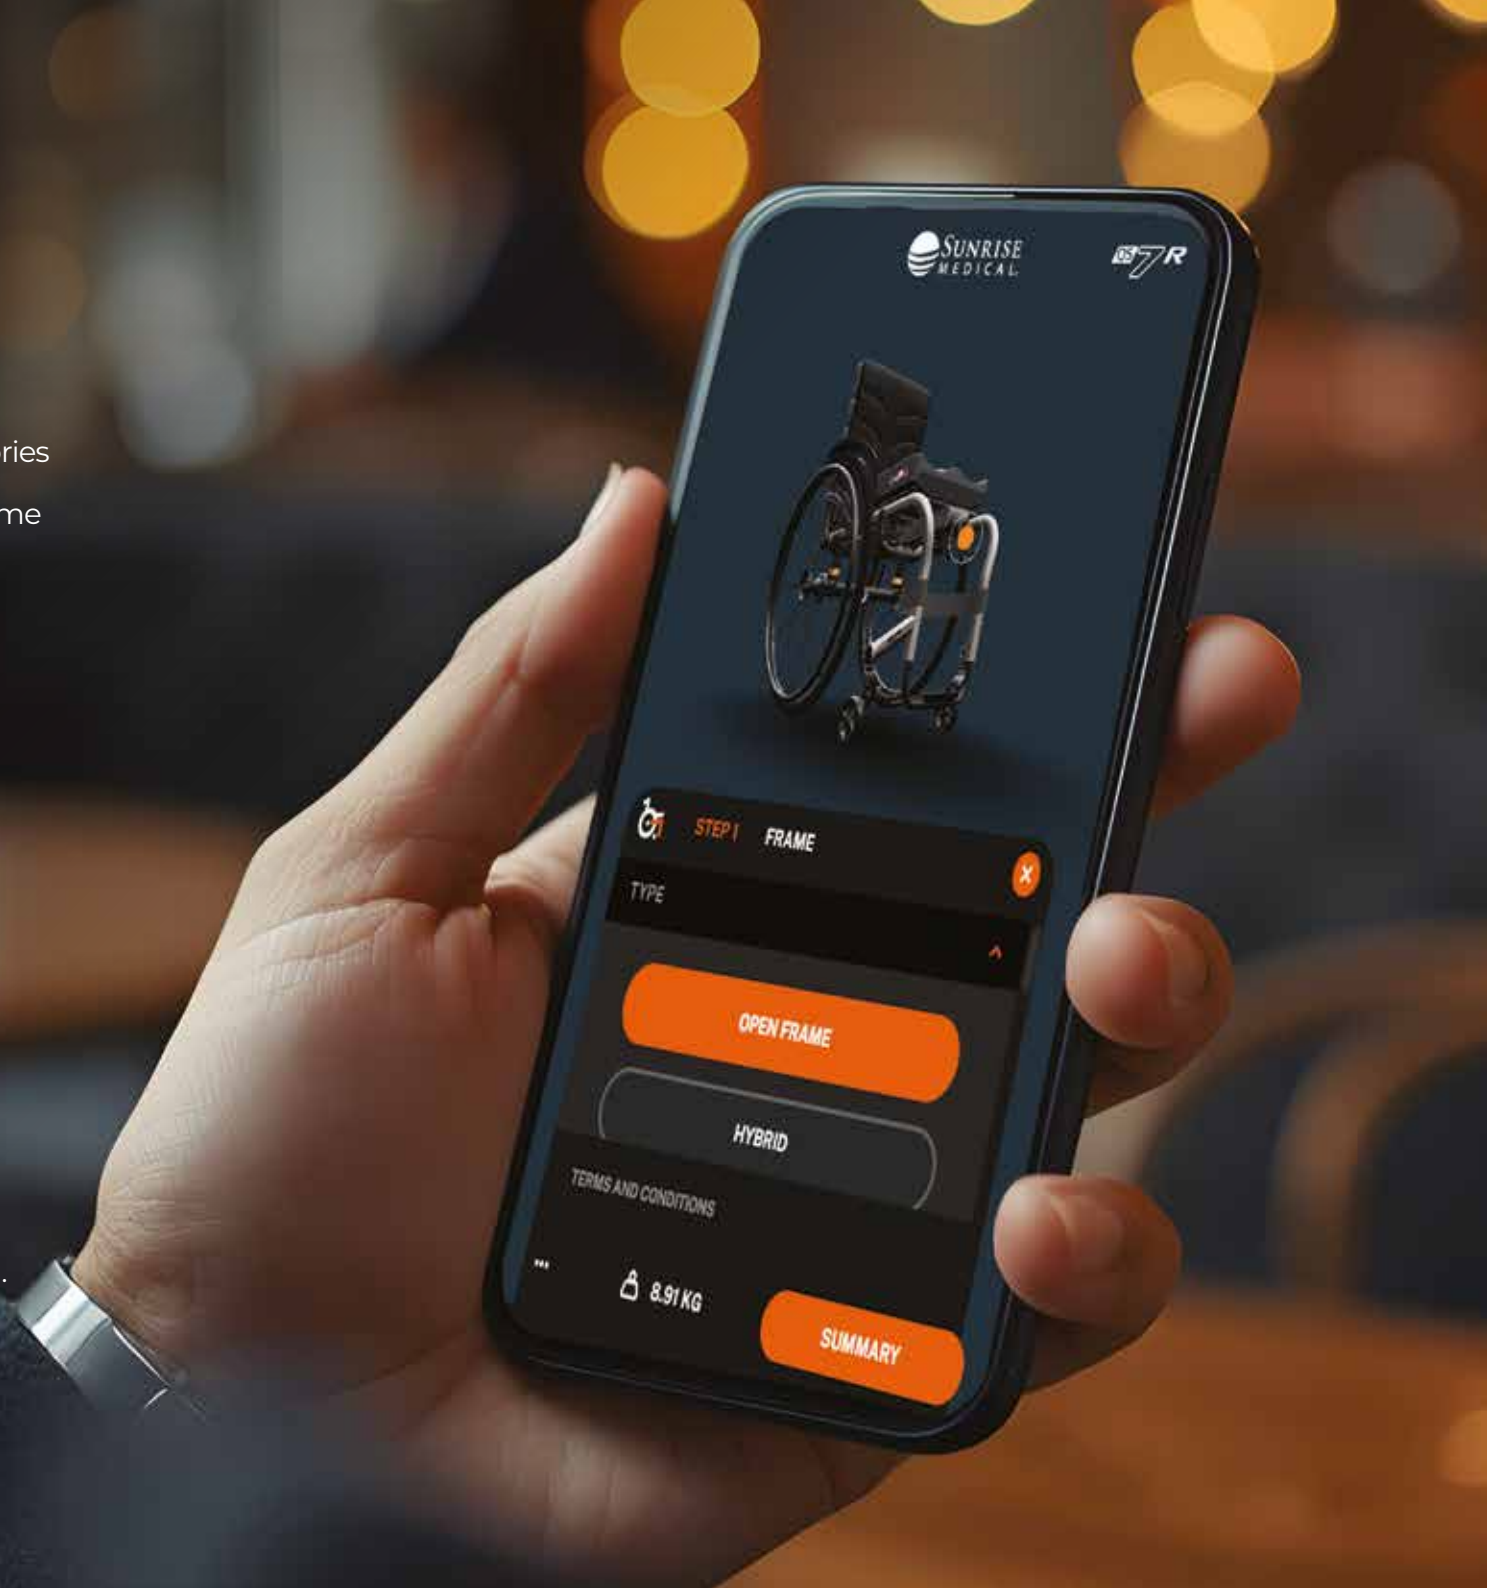
built4me



TECHNICAL DATA	QS7 R
Max. user weight	QS7 R - 125 kg, QS7 R Hybrid - 140 kg (136 kg with crash test option)
Seat width	320 - 500 mm (in 20 mm steps)
Seat depth	340 - 500 mm
Front seat height	400 - 560 mm
Rear seat height	370 - 500 mm
Backrest height	250 - 450 mm
Backrest angle	from -17,5° to + 10°
Total width	SW +170/230/290/360 mm at 0°, 3°,6°,9° camber and 24"wheels The total width can exceed 800 mm in certain configurations.
Total length	930 mm
Total height	1050 mm
Max turning circle	700 mm
Max. safe slope for use of parking brakes	10°
Frame versions	Open Frame, Hybrid, Pro options available
Frame angle	100°/92°/88° (EU) / 75°/80°/85° (NA)
Front wheel	3", 4", 5", 6"
Rear wheel	24", 25"
Wheelchair weight	Open frame from 7,5 kg (Pro frame from 7,2 kg) Hybrid frame from 8,4 kg (Pro Hybrid frame from 8,1 kg)
Dismantled weight	Open frame from 4,9 kg (Pro frame from 4,6 kg) Hybrid frame from 5,8 kg (Pro Hybrid frame from 5,5 kg)
Mass of heaviest part	2,1 kg
Removable parts	Rear wheels (for transportation)
Frame colours	22 colours
Crash tested	Yes (approved for transport in a vehicle according ISO 7176-19:2008)
Transport without user	Fix the wheelchair firmly and securely in the vehicle (e.g. car or plane)
Intended use and environment	For people unable to walk and with limited mobility; inside and outside. Operation by user or assistant.

Less effort. More life. Ready to experience the difference?
