| Order Information | User Weight |
|---|---|
| ☐ Order ☐ Calculation ☐ Built-4-Me® | Max. user weight Art. Nr. 77300000 / 77300001: 110 kg<br>Max. user weight Art. Nr. 77300003 / 77300004: 140 kg |
| Purchase Order No.: | **Art. No.:** 7730000 DE / 77300001 IC<br>77300003 DE / 77300004 IC |
| Order Date: Day Month Year | **User Weight:** kg |

**Please follow this measuring method:**

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

**Seat width (SW):**

a) For the user: Allow space between sideguard and hip on each side of the chair (approx. 10 - 20 mm altogether).
b) On the wheelchair: From outside frame tube to outside frame tube.

**Seat depth (SD):**

a) For the user: When sitting upright: leave space for 2 - 3 fingers between front edge of the seat upholstery and back of knee (approx. 30 - 60 mm). Care must be taken with adjustable upholstery.
b) On the wheelchair: From back tube to front of seat upholstery.

**Front seat height:**

a) For the user: When sitting with 90° kneeangle: From back of knee to bottom of shoe sole.
b) On the wheelchair: From front edge of the seat-upholstry, next to the seat-tube to the ground (min. 30 mm longer than user measurement). Remember to include the cushion height.

**Rear seat height:**

On the wheelchair: From rear edge of the seat-upholstery, next to the seat-tube to the ground.
**Note:** Maximum seat height difference rear to front is 110 mm.

**Back height:**

a) For the user: From the seat, including cushion, to be no more than 10 - 20 mm below the lower shoulder blade.
b) On the wheelchair: From top of the seat-upholstery to upper edge of backrest upholstery.
**Note:** The user's ability to sit upright has a major influence on the back height and it can therefore differ considerably.

**Back angle:**

Backrest-angle is measured in relation to the seat. 90°= perpendicular to the seat

## Technical Data

| | | | | |
|---|---|---|---|---|
| **Max. overall height:** | 1050 mm | **Max. overall width with:** | **24" Rear wheel** | **25" Rear wheel** |
| **Max. overall length:** | 1050 mm | For 0° camber: | SW + 160 mm | SW + 160 mm |
| **Max turning circle:** | 700 mm | For 2° camber: | SW + 210 mm | SW + 220 mm |
| **Overall weight:** | from 9,3 kg (Hybrid frame from 9,8 kg) | For 4° camber: | SW + 260 mm | SW + 270 mm |
| **Weight of heaviest detachable part:** | 2,1 kg | | | |
| **Transport weight (without rear wheels):** | from 6,6 kg (Hybrid frame from 7,1 kg) | | | |
| **Max. safe slope (with wheels locked):** | 10° | | | |

Please note that options such as i.e. armrest-sideguards or drum brakes can increase the overall width of the wheelchair. If this is the case, under certain circumstances, it may not be possible to use some or all of the available escape routes from a building. Please note that in certain configurations the wheelchair may exceed a width of 700 mm. It may be more difficult or impossible to travel on public transport.

Product is **crash tested according to ISO 7176-19** and therefore approved for transportation in a vehicle. In combination with QSF090100 (Tie down brackets for transportation) For transport wihout a user the chair must be safe clamped in the vehicle.

Please note that the technical data is based on a std configuration:
**Standard wheelchair 400 x 400 mm; 6 COG; Seat angle of 8°**

**Manufacturing tolerances can be +/- 10 mm on all configurations**

## Lightweight-Guide for ordering the QS7 X

Sunrise Medical offers a wide variety of options for the QS7 X to suit every user´s needs. However, most options add significant weight to the wheelchair. To make this more transparent when filling in the order-form, and to assist you in ordering the lightest possible wheelchair, we indicate the approximate weight-increase of the options on the order form:

**(L)** Indicates the lightest possible option within the range of options
**(+)** Indicates that this option adds more than 0,5 kg to the wheelchair´s weight compared to the lightest option within the range

## Frame

| | | |
|---|---|---|
| ☑ QSF010067 | Open frame, backrest-angle and CoG adjustable, 110 kg max user-weight | £2250 |
| ☐ QSF010035 | Hybrid frame, backrest-angle and CoG adjustable, 140 kg max user-weight<br>not possible with QSF010068 PRO frame | £2250 |

## Fixed welded Pro Options

**Important Note:**
Please check your measurements carefully as a QS7 X is non returnable.

± 10 mm center of gravity adjustment with QSF070703 adapter, standard. Only -10 mm center of gravity adjustment with QSF070701 adapter, lightweight by using additional passive adapter (76807018-ET).

| | | |
|---|---|---|
| ☐ QSF010068 | PRO: open frame, fixed welded CoG, 110 kg max. user-weight | £2750 |
