## Jay Backs

### Jay Basic Back

Designed for a client with mild postural needs, this back provides mild posterior support and comfort. It is available in three different height options and either as a back replacement or placed in front of existing wheelchair upholstery. Weight Capacity: 113kg

### Jay Go™ Back

A comfortable, wipeable and adjustable general use back upholstery. The JAY Go Back features wide Velcro® straps that are close together for effective, comfortable and easy to adjust back support. Weight Capacity: 136kg

SCIENCE OF SEATING

## Jay Cushions

### Jay Easy

The Jay Easy is a lightweight cushion, designed for the active client who requires mild to moderate positioning and moderate to high skin protection. The pre-contoured foam provides a stable base of support for the pelvis. The fluid pad in rear well offers moderate skin protection. Medial and lateral thigh contouring promotes optimal leg positioning. Weight Capacity: 113kg

### Jay Duo

The Duo lowers the wheelchair's seat to floor height and promotes foot propelling and / or independent transfers. Fluid in the rear protects ischials during foot propulsion. Weight Capacity: 113kg

### Jay Union

The JAY Union Cushion provides high performance tissue protection and positioning without extensive fitting considerations. It accomplishes this via a dynamic fluid-foam layering system that maximizes the Visco™ memory foam's ability to contour to the user's shape. This technology, joined with JAY's state-of-the-art cover technology, combine to create a cushion with outstanding performance characteristics that is also cool and comfortable. Weight Capacity: Products < 22" 136kg Products > 22" 227 kgs

## Jay Cushions

### Jay Easy Visco

The Jay Easy Visco has a molded foam base with more contouring. It comes with a curved base for seat sling or flat base for seat pan. The sacral notch prevents coccyx breakdown, the Visco foam in rear well offers low to moderate skin protection. This cushion is designed for the client sitting majority of the day, but is active, has sensation and/or does weight shifts. This cushion offers a light, low profile option. Weight Capacity: 113kg

### Jay Zip

The Jay Zip is a comfortable, clinically effective positioning cushion designed uniquely for kids. It weighs just over half a kilo and has a weight capacity of 75 kg. The cover is machine washable and quick to dry. It also features a dual layered contoured foam base. Weight Capacity: 75kg

### Jay Lite

The Jay Lite is the lightest cushion in its class constructed with 3DX™ Microclimatic spacer fabric and air flow base. It provides heat and moisture dissipation, good pressure distribution and stability. Designed for the client with low to moderate positioning and skin protection needs. Weight Capacity: 113kg
