

FORM. FUNCTION. FIT

JAY® Fit Seating simplifies the world of custom seating by offering a “semi-custom” seat and back solution. A great option for individuals who require more complex seating than off-the-shelf options can provide, while still allowing for adjustments and growth.

FIT

Adjustability

The JAY Fit's modular and interchangeable components allow the system to be grown and modified over time.

- Well Inserts
- Lateral Well Reducers
- Lateral Pelvic Supports
- Lateral Thigh Supports
- Flip-Down Medial Thigh Supports
- Posterior Contour Strips
- Lateral Thoracic Supports
- Lateral/Posterior Pelvic Supports
- Lateral Pyramids
- Thoracic Pads

New Swing-Away Lateral Design

The JAY Fit system now features a new swing-away lateral design with increased adjustability and improved stability.

- Adjustable for a wide range of mounting options.
- Secure locked position for improved feel when engaged.

Available with Whitmyer Headrest and JAY Positioning Supports

The JAY Fit system is available with the most widely used position support options. The most commonly-used options are now on the order form and can be easily mounted at the factory.

- JAY Pelvic Positioning Belts
- JAY Anterior Trunk Supports
- JAY Shoe Holders
- Whitmyer® Headrests
- JAY Spine Align Components
