

JAY LITE

LIGHTWEIGHT.
BREATHABLE.
COMFORTABLE.

ULTRA LIGHTWEIGHT...

The perfect complement to an ultra lightweight wheelchair, such as the Quickie Helium and Quickie Xenon, the JAY Lite is the lightest cushion in its class.

Ultra lightweight from 660g, and offering increased skin protection, stability and comfort, the JAY Lite is the ideal cushion for the active user.

... AND BREATHABLE

Always active and on the go, you will generate heat underneath your buttocks and thighs that can lead to skin breakdown.

The JAY Lite uses innovative cushion technology to promote air-flow under the user whilst sat in their wheelchair.

The 3DX™ microclimatic cover and Olotex “airflow” base vents both heat and moisture through the cushion’s materials. This, added to the cushions’ styling, ensures users stay cool and look cool!

SUPERIOR POSITIONING

The JAY Lite cushion provides increased skin protection, stability and comfort. To minimise the risk of pressure sores, the anthropometrically designed Optiwell pelvic loading area (PLA) effectively reduces loading on the ischial tuberosities without overloading the hip bones.

Apart from increasing breathability, the lightweight reticulated foam insert features a 'scoop-out' which helps to redistribute pressure under the seat bones. Plus, the pre-contoured foam base provides the support you need to keep active and comfortable!

Pelvic loading area

Redistributes weight to reduce the risk of pressure sores

Sacral notch

Protects the coccyx area

Ischial well cutouts

Reduces pressure under the ischial tuberosities to

Reticulated foam insert

Superior breathability, washable and removable

Pre-contoured base

Increased stability and leg support

ONE CUSHION WITH THE CHOICE OF TWO DIFFERENT BASE CONTOURS.

The JAY Lite cushion offers two different contoured base versions. The standard base is ideal for most users who require comfort and pressure redistribution. The standard low-profile contour allows for easier transfers in and out of the wheelchair. Alternatively, for those who require a higher level of postural stability, the JAY Lite P version provides deeper leg troughs which increases the overall stability of the thighs and pelvis.

→ **JAY LITE - low profile contour**
Provides mild leg support and allows easy transfers.

→ **JAY LITE P - positioning contour**
More leg positioning through optional lateral and medial thigh support for increased overall stability.

INNOVATIVE AND FUNCTIONAL DESIGN

The JAY Lite's design meets the lifestyle needs of an active user - lightweight, low profile, breathable, pressure relieving and stable. The bevelled front edge prevents rubbing against the back of the legs, eliminating the need for using a shorter length. The corner cut at the lower sides of the cushion also reduces the load on the trochanter (and reduces the seat-to-floor height). The personal carrying handle offers an easy grip and the notches for back canes locks the cushion into place.

Grey rubber non-stick bottom
Breathable and anti-slip

Corner cut
To reduce load on the trochanters

For easy grip

Select your cushion insert.

The JAY Lite cushion offers two different well inserts.

The reticulated foam insert uses an air-flow cover and optimises breathable airflow. The entire insert is also machine washable at 60°C and quick drying.

The optional PU foam insert comes with an incontinence cover that's water-resistant and easy to wipe-off and clean.

→ Reticulated foam insert

With air flow cover.
Superior breathability,
machine washable. Central
scoop-out reduces pressure

→ PU foam insert (optional)

With incontinence cover.
Insert cover is water-
resistant and easy to
wipe off and clean.
