XENON² – THE STYLISH, HIGH-PERFORMANCE SERIES

“Music is her passion. Her voice is expressive: Monika Kuszyńska represented Poland in the Eurovision Song Contest in Vienna performing her song “In the Name Of Love”. In Poland she is already very successful and is also sharing her message with people all over the world.

Whether you're looking for one of the very best in driving dynamics or compact folding dimensions, there's a Xenon² just for you.

Will it be the clean, streamlined design of the Xenon² FF? Alternatively how about the reinforced rigidity of the Xenon² Dual? Or the practical portability of the Xenon² SA? Whichever one of the three feature-packed models you choose, the sophisticated elegance of the Xenon² will always make you the centre of attention.

XENON² FF THE LIGHTEST

One of the lightest folding wheelchairs in the world.
Open fixed front frame.
Cool, clean and streamlined design.

XENON² DUAL THE STRONGEST

No compromises in terms of rigidity.
Reinforced fixed front frame.
Maximum user weight 140 kg.

XENON² SA THE ALLROUNDER

Easy standing transfers in and out of your wheelchair.
Reinforced frame with swing away footrests.
Compact folded dimensions for easy portability.

XENON²

Ultra lightweight wheelchairs
with outstanding folding and
driving performance

ONE OF THE LIGHTEST FOLDING WHEELCHAIRS IN THE WORLD...

How do you achieve a folding wheelchair that weighs as little as 8.8 kg? By using premium frame materials like aerospace-grade aluminium and an innovative process that's unique only to Quickie – ShapeLoc Technology.

By heat-treating the aluminium, we're able to increase its strength, which allows for the frame's tube walls to be thinner, lighter and stronger than a conventional folding wheelchair. Just feel it...

...WITH PEERLESS FOLDING PERFORMANCE

At the core of the Xenon² is a unique cross-brace that fits so neatly under the seat it's barely noticeable – giving a very minimalistic, open-frame feel that you'd usually associate with a rigid wheelchair.

But the similarities don't end with the appearance – the completely re-designed axle stem, combined with the new cross-brace, provides the stiff, stable driving performance feel of a rigid frame, but with all the portability of a folding one.

→ **Easy to use folding mechanism**

The new aluminium latches on the cross-brace will also keep your wheels in parallel when folding, so your Xenon² remains stable, no matter the situation.

STYLE IN MOTION

Personalise your Xenon² and stand out from the crowd with a versatile palette of 32 frame colours. There's also 5 distinctive anodised styles to choose from for the castor fork and wheel. You can even accentuate your colour scheme further by matching or contrasting the upholstery trim colour of the EXO backrest upholstery.

→ Personalize your Xenon²

with a selection of 32 eye-catching colours sure to suit your style

Monika Kuszyńska: *I like fashionable outfits. The attractive design of the Xenon² compliments my creative style perfectly.*

→ Choose your own castor and fork style

The anodized front castors and the forks are selectable in silver, blue, red, orange or black for an unique look

→ Add some colour to your back upholstery

This very comfortable and stylish Exo back upholstery can be chosen with 5 different colour binding tapes.

XENON²

One of the lightest folding
Wheelchairs in the world...

① Centre of Gravity

Enables a driving characteristic from very active to passive.

② Backrest Angle

The right back angle adjustment is important for your ergonomic posture.

③ Rear Seat Height

Exactly as it should be - adjust the height to your personal need.

ADJUSTABLE TO SUIT YOU

Exactly as it should be – designed to be adaptable to your changing needs, the axle stem on the Xenon² provides easy height adjustment.

You want to change your chair driving characteristic from passive to more active or the opposite way? Just change the centre of gravity setting by simply repositioning the axle stem. And don't forget to adjust the back angle for your ergonomic posture.

Monika Kuszyńska: *My Xenon² is very like my music, it feels like a part of me. It's like a companion when I travel all around the world.*

Options and features of the Xenon² series – Configure your wheelchair to your individual needs.

For further information on product options please see the Xenon² and Xenon² SA order form.

// FOLD-DOWN BACKREST

This half-folding backrest folds to the front to minimise the size of the wheelchair for transportation.

// SURGE® LT HANDRIMS

Its GRIPTON rubber strip on top of the ergonomic oval shaped rim offers maximum traction.

// PADDED TUBULAR ARMREST

Due to the swing away functionality this armrest gives you the support when needed and will not interfere during propulsion.

// CARBON SIDEGUARD

Very individual and lightweight sideguard with its unique look.

// ANGLE ADJUSTABLE BACK

Stylish designer backrest solution integrated into the frame. Backrest angle from 75° to 103° in 4° increments.

// DESK SIDEGUARD

This flip-up and removable sideguard can be ordered with fixed or height adjustable armrests.

// AUTO-FOLDING FOOTPLATE

This footplate is angle and depth adjustable and available in carbon or composite. Available for fixed front frame versions.

// TIE-DOWN BRACKETS FOR TRANSPORTATION

With this option the wheelchair is approved for transportation in a vehicle (crash tested according to ISO 7176-19).
