

# ***XENON<sup>2</sup>***

THE LIGHTEST  
ALUMINIUM FOLDING  
WHEELCHAIR IN  
THE MARKET

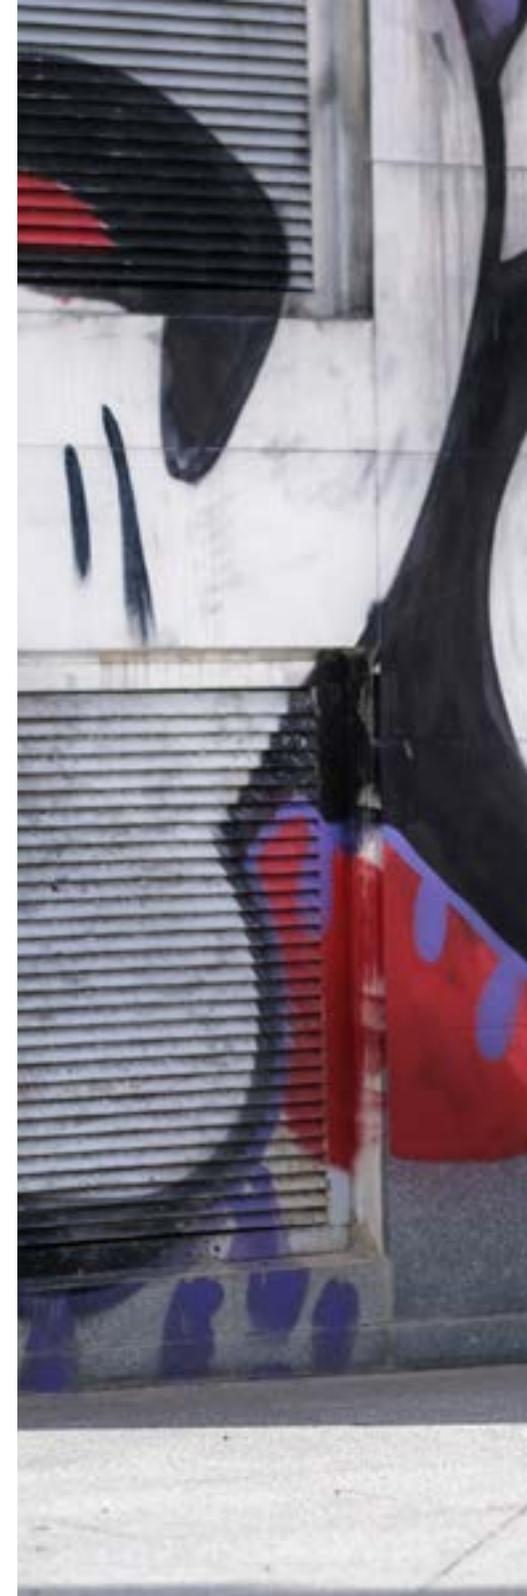

# XENON<sup>2</sup> – THE STYLISH, HIGH-PERFORMANCE SERIES

---

Whether you're looking for the very best in driving dynamics or the most compact folding dimensions, there's a Xenon<sup>2</sup> just for you.

Will it be the clean, streamlined design of the Xenon<sup>2</sup> FF? Alternatively how about the reinforced rigidity of the Xenon<sup>2</sup> Hybrid? Or the practical portability of the Xenon<sup>2</sup> SA? Whichever one of the three feature-packed models you choose, the sophisticated elegance of the Xenon<sup>2</sup> will always make you the centre of attention.

## **XENON<sup>2</sup> FF** THE LIGHTEST

Lightest folding wheelchair in the market.  
Open fixed front frame.  
Cool, clean and streamlined design.

## **XENON<sup>2</sup> HYBRID** THE STRONGEST

No compromises in terms of rigidity.  
Reinforced fixed front frame.  
Maximum user weight 140 kg.

## **XENON<sup>2</sup> SA** THE ALLROUNDER

Easy standing transfers in and out of  
your wheelchair.  
Reinforced frame with swing away footrests.  
Most compact folded dimensions for easy  
portability by car.

## LIGHTEST WHEELCHAIR IN THE MARKET...

---

How do you achieve a folding wheelchair that weighs as little as 8.8 kg? By using premium frame materials like aerospace-grade aluminium and an innovative process that's unique only to Quickie – ShapeLoc Technology.

By heat-treating the aluminium, we're able to increase its strength, which allows for the frame's tube walls to be thinner, lighter and stronger than a conventional folding wheelchair. Just feel it...

## ...WITH PEERLESS FOLDING PERFORMANCE

---

At the core of the Xenon<sup>2</sup> is a unique cross-brace that fits so neatly under the seat it's barely noticeable – giving a very minimalistic, open-frame feel that you'd usually associate with a rigid wheelchair.

But the similarities don't end with the appearance – the completely re-designed axle stem, combined with the new cross-brace, provides the stiff, stable driving performance feel of a rigid frame, but with all the portability of a folding one.

→ **Easy to use folding mechanism**

The new aluminium latches on the cross-brace will also keep your wheels in parallel when folding, so your Xenon<sup>2</sup> remains stable, no matter the situation.

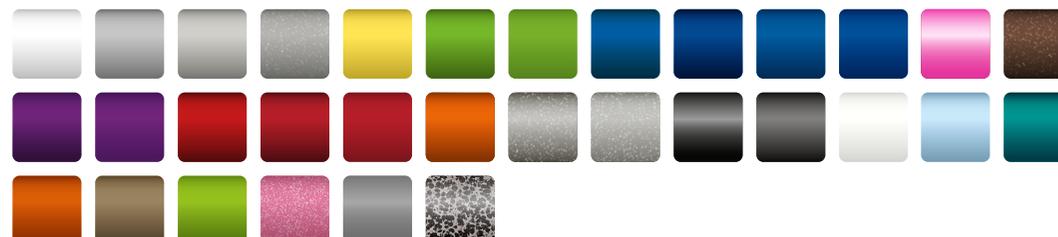

# STYLE IN MOTION

---

Personalise your Xenon<sup>2</sup> and stand out from the crowd with a versatile palette of 32 frame colours. There's also 5 distinctive anodised styles to choose from for the castor fork and wheel. You can even accentuate your colour scheme further by matching or contrasting the upholstery trim colour of the EXO backrest upholstery.

→ **Personalize your Xenon<sup>2</sup>**  
with a selection of 32  
eye-catching colours

” **Yeray Betancor:** *I was looking for a wheelchair for someone with an active life. I wanted it to be lightweight, modern, folding and easy to lift up to the car with just one hand – and the QUICKIE Xenon<sup>2</sup> ticks all those boxes.*

→ **Add some colour to your back upholstery**

This very comfortable and stylish Exo back upholstery can be chosen with 5 different colour binding tapes.

→ **Choose your castor and fork own style**

The anodized front castors and the forks are selectable in silver, blue, red orange or black for an unique look

” **Yeray Betancor:** *I've always been a QUICKIE guy: active and dynamic and I think that the QUICKIE Xenon<sup>2</sup> is the best fit for me.*

# ADJUSTABLE TO SUIT YOU

---

Exactly as it should be – designed to be adaptable to your changing needs, the axle stem on the Xenon<sup>2</sup> provides easy height adjustment.

You want to change your chair driving characteristic from passive to more active or the opposite way? Just change the centre of gravity setting by simple repositioning of the axle stem. And don't forget to adjust the back angle for your ergonomic posture.

## 1 Centre of Gravity

Enables a driving characteristic from very active to passive.

## 2 Backrest Angle

The right back angle adjustment is important for your ergonomic posture.

## 3 Rear Seat Height

Exactly as it should be - adjust the height to your personal need.

**XENON² FF**  
THE LIGHTEST

**XENON² HYBRID**  
THE STRONGEST

**XENON² SA**  
THE ALLROUNDER

# XENON²

Ultra lightweight wheelchairs  
with outstanding folding and  
driving performance

Options and features of the Xenon<sup>2</sup> series – Configure your wheelchair to your individual needs. For further information on product options please check the Xenon<sup>2</sup> and Xenon<sup>2</sup> SA order form.

**// FOLD-DOWN BACKREST**

This half-folding backrest folds to the front and achieves a small pack size of the wheelchair for transports.

**// SURGE<sup>®</sup> LT HANDRIMS**

Its Gripton rubber strip on top of the ergonomic oval shaped rim offers maximum traction.

**// ANGLE ADJUSTABLE BACK**

Stylish designer backrest solution integrated into the follow of the frame. Backrest angle from 75° to 103° in 4° increments.

**// DESK SIDEGUARD**

This flip-up and removable sideguard can be ordered with fixed or height adjustable arm pads.

**// PADDED TUBULAR ARMREST**

Due to the swing away possibility this armrest gives you the support when needed and do not hinder during propulsion.

**// CARBON SIDEGUARD**

Very individual and lightweight sideguard with its unique look.

**// AUTO-FOLDING FOODBOARD**

This foodplate is angle and depth adjustable and available with carbon or composite. Available for fixed front frame versions.

**// TIE-DOWN BRACKETS FOR TRANSPORTATION**

With this option the wheelchair is approved for transportation in a vehicle (crash tested according to ISO 7176-19).
