

NEON²

MODERN. SMART. INDIVIDUAL.

Bursting with personality, the lightweight and affordable Neon² provides an energy-efficient ride that you'll never want to be without. The sleek, effortlessly foldable open-frame fits easily in the smallest car – and this is a wheelchair you'll never want to leave behind!

You are looking for individuality? Paint your personality all over the Neon² with a beautiful selection of colours for the frame, upholstery trims, wheels and forks. When you're done customising, it's not just the wheels that turn, heads will too.

Take a closer look at the new QUICKIE Neon² and we think you'll agree – you don't need to break the bank to enjoy a first class ride.

// FINE-TUNE YOUR BACK UPHOLSTERY

It's not just comfortable – Stand out from the crowd with a versatile pallet of 5 upholstery trims.

// LIFE IS COLOURFUL

Tailor your Neon² with a selection of 32 eye-catching colours.

// HEAD-TURNING LOOK

There's also 5 distinctive styles to choose from for the castor fork and wheel.

// THE SPECIAL ONE

Accentuate your colour scheme further by matching the rim and hub of your 24" rear wheel with 3 anodized colour selections.

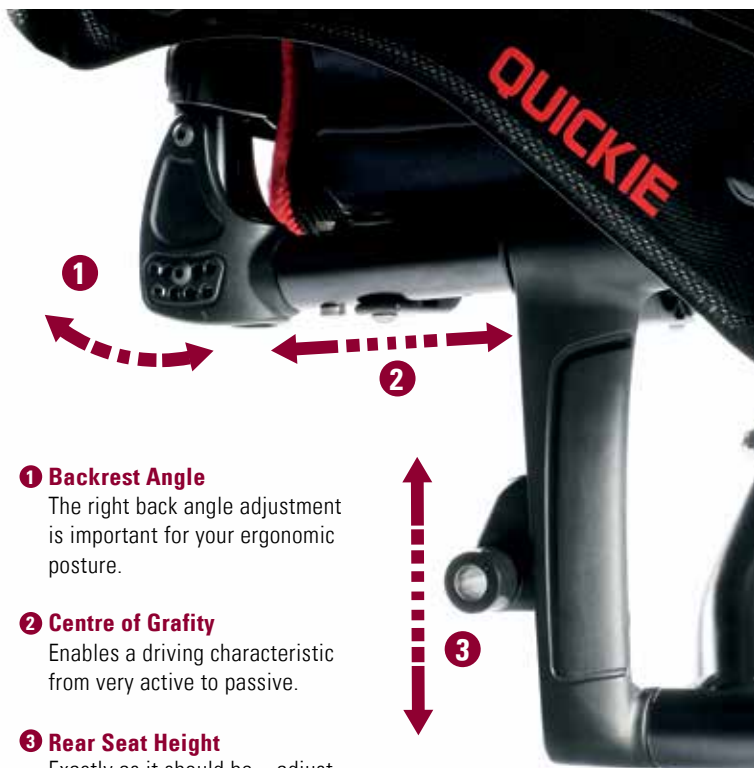

NOTED FOR ITS **VERSATILITY**

At the heart of the Neon² is a reinforced open-frame. The firmness of the cross-brace and seat tubes provide an rigid-feel driving performance by reducing the flex of the wheelchair when in motion – all without sacrificing the benefits of a folding frame.

Speaking of folding, the unique open-rear of the frame allows for very compact space saving dimensions. The swing-away legrests not only ensure easy transfers in and out of your wheelchair, they're removable too. Combine it with the optional half-folding back and what you have is an extremely compact package that will fit in the smallest of cars.

The versatility of the Neon² doesn't end there. The durable aluminium axle-stem allows for simple adjustments to the rear seat height and centre-of-gravity. Need to adjust the backrest angle? It's just as easy via the aluminium backrest bracket – all without the need of being without your wheelchair.

1 Backrest Angle

The right back angle adjustment is important for your ergonomic posture.

2 Centre of Gravity

Enables a driving characteristic from very active to passive.

3 Rear Seat Height

Exactly as it should be – adjust the height to your personal need.

// PRACTICAL PORTABILITY WITH SWING AWAY FOOTRESTS

They support easy standing transfers in and out of your wheelchair and offer very compact folded dimensions for easy portability by car.

NEON²

WHEN COMPACT
DIMENSIONS AND EASY
TRANSFERS COUNT.

OPTIONS AND FEATURES OF THE NEON²

Configure your wheelchair to your individual needs. For further information on product options please check the Neon² order form.

// ADD SOME COLOUR TO YOUR UPHOLSTERY

This very comfortable and smart backrest upholstery can be tailored by 5 different colour trims.

// SEVERAL PUSH HANDLES

Choose the pushhandle which fits best for you. Decide between the integrated one (as shown) or the fold-down or height adjustable one.

// ANGLE ADJUSTABLE BACK

Designer backrest solution integrated into the follow of the frame. Backrest angle from 75° to 103° in 4° increments.

// ONE ARM FORK

This one arm fork especially in combination with the coloured aluminum forks gives your chair the special finish.

// CARBON PLATFORM FOOTPLATE

Lightweight and stylish flip-up footplate (sideways) with angle and depth adjustment.

// CARBON SIDEGUARD

Very individual and lightweight sideguard with a unique look.

// FOLD-DOWN BACKREST

This half-folding backrest folds to the front and achieves a small wheelchair size for portability.

// SURGE® LT HANDRIMS

Its Gripton rubber strip on top of the ergonomic oval shaped rim offers maximum traction.
