

# EMINEO

## Lightweight comfort wheelchair

When activity and rest are  
equally important

The Emineo gives you options you won't find with other wheelchairs. Active driving position, stable sitting position for activity, or resting position when you want a break. The unique tilt function can be used by either the user or the caretaker.

## Well equipped in standard version

- Comfort and sitting stability
- User-operated tilt function
- Very good rolling characteristics
- Simple and quick to adjust
- Attractive and modern design

### Head and neck supports

Head and neck support system with great functionality from few variants. Two standard models. Two advanced models.

### Fixed leg support

Smart leg support which can quickly and easily be adjusted to 70°, 80° or 90°. Very stable and lightweight. Leg support is approved for lifting with user in chair (140 kg).

### Angle adjustable legrest

Angle adjustable and length-compensating legrest which locks securely in one single action. The leg support follows the knee's natural point of rotation, and does not stick up above seat height. This makes sideways transfer easier.

### Side supports

The functional side supports can be swung out for easy transfer. Height- and depth-adjustable, with stable and comfortable padding.

# EMINEO
