### Please follow this measuring method:

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

#### Seat width (SW):

- a) *For the user:* Allow space between sideguard and hip on each side of the chair (approx. 10 - 20 mm altogether)
- b) *On the wheelchair:* From outside frame tube to outside frame tube.

#### Seat depth (SD):

- a) *For the user:* When sitting upright: leave space for 2 - 3 fingers between front edge of the seat upholstery and back of knee (approx. 30 - 60 mm). Care must be taken with adj. upholstery.
- b) *On the wheelchair:* From back tube to front of seat upholstery.

#### Front seat height:

- a) *For the user:* When sitting with 90° kneeangle:  
From back of knee to bottom of shoe sole.
- b) *On the wheelchair:* From front of seat tube to the ground .  
(min. 30 mm longer than user measurement)  
Remember to include the cushion height.

#### Rear seat height:

- b) *On the wheelchair:* From back of seat tube to the ground.  
**Note:** Max. seat height difference rear to front is 130 mm

#### Back height:

- a) *For the user:* From the seat, including cushion, to be no more than 10 - 20 mm below the lower shoulder blade.
- b) *On the wheelchair:* From back of seat tube to upper edge of backrest upholstery.  
**Note:** The user's ability to sit upright has a major influence on the back height and it can therefore differ considerably

#### Back angle:

**Important:** The back height depends on the degree of disability.  
0° is the angle 90° to the seat. Negative angles are <90°  
and positive angles are >90°.

#### Low Seat Frame vs. High Seat Frame:

The high frame is 40 mm higher than the low frame. So you can choose shorter and lighter forks to minimize the weight of your wheelchair.

#### Technical Data Overview:

LIGHTWEIGHT-GUIDE FOR ORDERING THE KRYPTON F

Sunrise Medical offers a wide variety of options for the Krypton F to suit every user’s needs. However, most options add significant weight to the wheelchair. To make this more transparent when filling in the order-form, and to assist you in ordering the lightest possible wheelchair, we indicate the approximate weight-increase of the options on the order form:

- (L) indicates the lightest possible option within the range of options
- (+) indicates that this option adds more than 500 g to the wheelchair’s weight compared to the lightest option within the range

LIGHTWEIGHT OPTIONS FOR THE KRYPTON F

We developed several options for the Krypton F to save weight on the chair without sacrificing daily-use suitability, comfort or durability

**Carbon fibre backrest:** carbon backrest tubes. Fixed height. (-160 g compared to aluminium backrest)

**Axle-stems cut-to-length (KRF010412):** specifically cut to your seat-height. Upwards adjustment limited (only +1 cm) (- 200 g for rear seat height 430 mm compared to full-length axle-stem)

## FRAME VERSIONS: CASTOR HOUSE POSITIONS

### Position wide:

Further to the front and wider position of the casters for optimized rolling resistance and improved front-stability

### Position narrow:

22 mm further rearwards and 24 mm per side more narrow position of the casters for a more narrow front-end and improved manoeuvrability in tight spaces. Reduced front-stability compared to position wide, we recommend this option in combination with seat-height differences (front to rear) of 40mm or seat-

**KRF010302** Castor house position narrow
