

Q300R

The compact powerchair that
doesn't downsize on adventure.

DON'T DOWNSIZE ON ADVENTURE BECAUSE YOU WANT A COMPACT POWERCHAIR.

That's why with the **Q300 R**, you're not expected to. Indoors, it's highly manoeuvrable - super narrow and nimble in the most-crowded of situations. Yet, venture outside and it boasts the fierce traction, motor technology and drive performance to rival a much larger powerchair.

And it's our rear-wheel design that makes all the difference. A meticulously tested and refined base that provides the perfect balance between stability and size. It's also a base that can position your weight to maximise grip and conquer those big wide-open spaces. Prefer indoor agility over performance? Choose the 12" drive wheels for the tightest turning and manoeuvring.

Whichever you choose, its sophisticated **SEDEO LITE** seating system provides the same clinical support for the most challenging of conditions. Available with a host of power seat options and striking shroud and accent colours to dazzle, the **Q300 R** looks (and feels) amazing inside and out.

ALL-ROUND PERFORMANCE

THOUGHT ALL REAR-WHEEL CHAIRS DROVE THE SAME? THINK AGAIN.

Take the Q300 R for a spin and you'll notice the difference. The way it grips the ground. The superb handling. But how does it achieve what others can't?

It's all thanks to the Q300 R's optimised base. By carefully testing and refining hundreds of precision adjustments to the width, length, wheel, and seat position, we found the smallest base geometry without compromising stability or traction.

Because the Q300 R is so stable, it can also support a wider range of centre-of-gravity adjustment. So, your seat position can be moved further forward or back to better balance your weight and increase traction and drive performance. Plus, you also get a compact chair that performs just as good indoors too!

OUTDOOR PERFORMANCE

GET TO GRIPS WITH GREATER TRACTION.

With a precision-measured base that's geared for outdoor performance, the Q300 R has all the serious grip and ride performance you need to handle a busy city centre or off the beaten track.

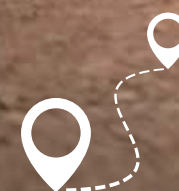

KERB CLIMBING

No drop kerb in sight? Thankfully, the Q300 R with its boot-style kerb climber can smoothly handle kerbs of up to **100 mm**. Now you can say goodbye to taking the long way around.

14" DRIVE WHEELS

Looking for pure outdoor performance? 14" Drive wheels provide greater traction and stability over the harshest of terrain. They'll also keep your Q300 R slim at **580 mm**.

32 km

RANGE

Powered by (optional) punchy **63 Ah batteries**, you'll get everywhere you want to go without having to rush back with a range of up to **32km (20 miles)**.

REAR SUSPENSION

Providing responsive cushioning when driving over bumpy or uneven terrain, the Q300 R's rear suspension reduces the amount of shock and vibration that passes through your powerchair. So, you can sit-back and enjoy a soft and smooth ride.

KEEP ON TRACK WITH GYRO CONTROL

As there's fewer castor wheels to spin back into direction when turning, the Q300 R naturally drives in a straight line at higher speeds and covers ground more quickly without needing to oversteer. But when you do encounter a non-level surface, the optional Gyro Control will automatically make frequent steering corrections to keep you moving in a straight line - beneficial if you're using speciality controls or have poor hand co-ordination.

INDOOR MANOEUVRABILITY

AT HOME, INSIDE AND OUT.

From tight corridors, busy offices to tiny homes, the Q300 R's slim 580 mm base takes everything in its stride. With superb handling and intuitive rear-wheel drive, you'll find it incredibly easy to manoeuvre.

430 mm

SEAT-TO-FLOOR HEIGHT

Fit comfortably under tables or when driving your powerchair into your wheelchair adapted vehicle with the Q300 R's ultra-low seat-to-floor height that starts from **430 mm (17")**.

1800 mm

TURNING CIRCLE

1100 mm

BASE LENGTH

Ultra-short in length, the Q300 R fits in-and-out of the smallest spaces, so you no longer have to worry about taking up too much space behind.

GET EVEN MORE COMPACT.

Looking for tighter manoeuvrability? Opt for 12" drive wheels and centre mount, the Q300 R's ultra-slim 550 mm base can go where others can't. Plus, it's light enough (from 124 kg with 50 Ah batteries) to be compatible with most floor lifts too.

BASE LENGTH

GET CLOSER WITH THE CENTRE MOUNT LEGREST

With the centre-mount legrest, not only can you get closer to objects (like tables or serving counters), but you'll get the tightest turns too!

POWER SEATING

SEDEO LITE, THE BEST SEAT IN THE HOUSE.

Combining an adjustable and configurable seat with the broadest choice of support and positioning options, the SEDEO LITE is the medium-to-high clinical seating solution that's designed to be tailored to your changing needs (and all with just one tool).

INTEGRATED SEAT RAIL

The integrated seat rail offers many mounting options for positioning elements like lateral thoracic, thigh and knee supports. All you need to do is attach and slide into position.

UNIVERSAL HEADREST

Compatible with **SEDEO** and **WHITMYER** headrests, this mount will help to address a range of head-support needs (from basic to multiple-point control).

LENGTH COMPENSATING, SWING-AWAY LEGRESTS

Adjustable in length to achieve the best fit, these legrests swing away for easier seat transfers. Also available as a power elevating and centre mount versions.

SEDEO PRO FLEXIBLE BACK.

Upgrade to this unique backrest that effortlessly combines adjustable full rear back and side trunk support with the highest level of immersion that must be felt to be believed!

SHAPES TO YOUR SPINE

Unlike solid backs, the Flexible Back wraps around and contours to your spine's shape to provide complete contact, comfort, and stability. Because it wraps around you, the integrated laterals hug your sides, causing the foam to mould to your anatomical curves and keeping your trunk stable and aligned.

It's so immersive, even moderate-to-severe kyphotic postures or spinal scoliosis can be accommodated.

DO YOU HAVE SPECIFIC SEATING REQUIREMENTS?

The SEDEO LITE is also compatible with **J3 Back**. Suitable for moderate-to-high positioning, the J3 Back offers the widest range of sizes, shapes, and options to precisely fit and tailor your seat just to you.

POWER OPTIONS

POWER-UP YOUR POWERCHAIR.

The Q300 R doesn't just have **BIG** chair performance, it's also loaded with **BIG** features to meet your clinical and lifestyle needs.

POWER ELEVATE AND TILT

Reach new heights with **300 mm** of seat lift and get to everyday objects that would otherwise be out of grasp. Transferring is easier too thanks to being in a higher position to stand from. Plus, with **30°** of tilt, you can sit back and enjoy greater relaxation and pressure distribution.

R-NET ADVANCED JOYSTICK

Upgrade your on-board technology with this large, easy-to-read HD display and simple to use paddle switches. Its built-in Bluetooth and i-device technology also allows you to connect to your smart devices all from the comfort of your Q300 R.

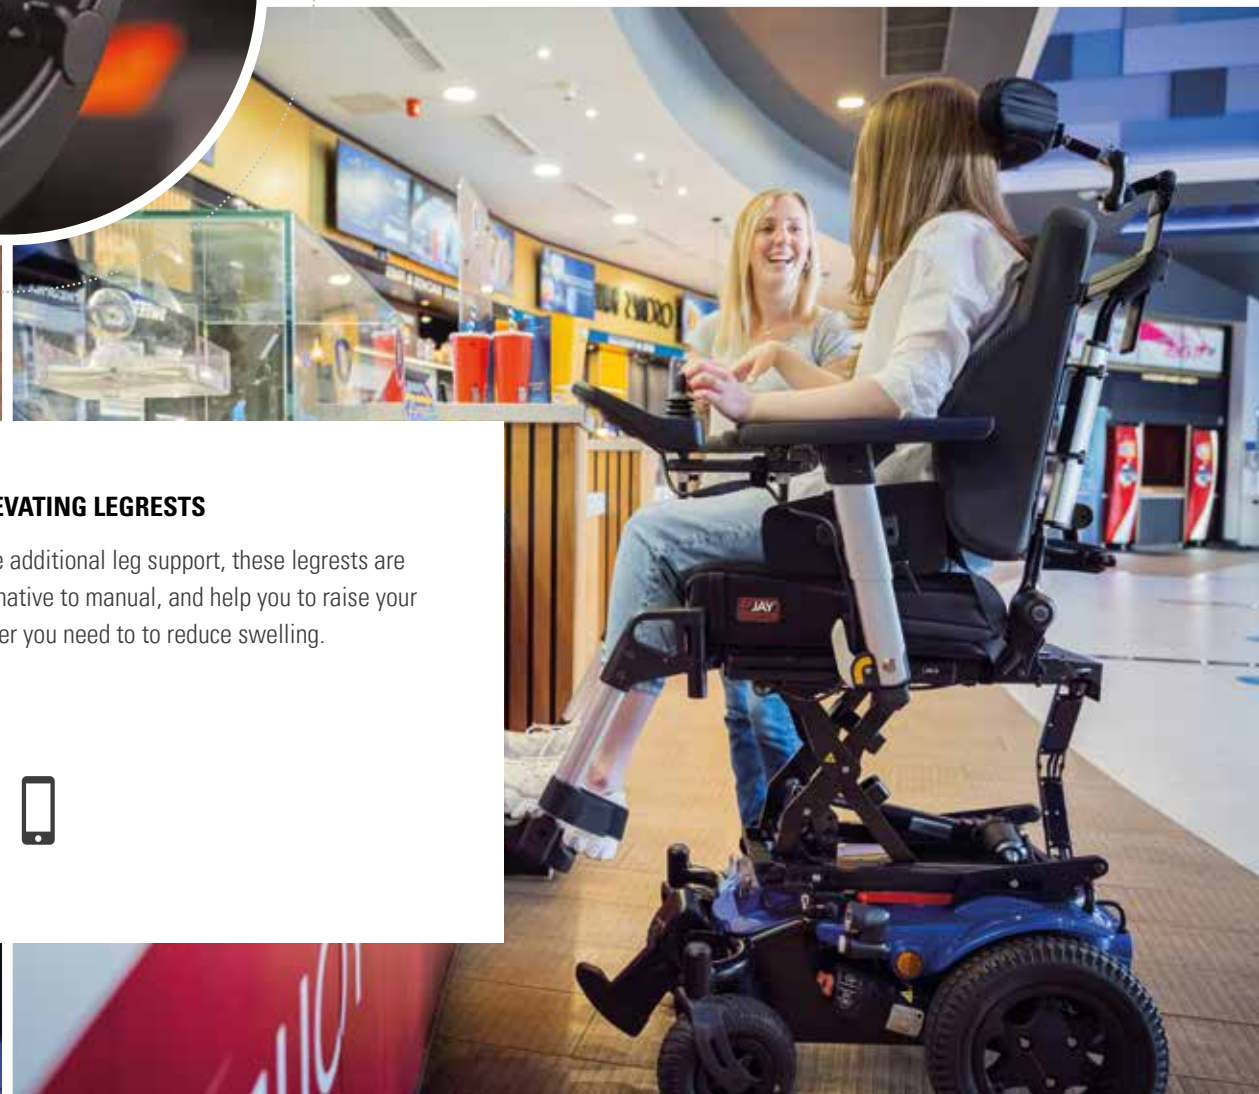

120° POWER RECLINE

Need to relieve pressure and re-distribute your weight throughout the day? Power recline enables you to adjust your seat-to-back angle in a similar manner to how a seat would recline in a car.

POWER ELEVATING LEGRESTS

If you require additional leg support, these legrests are a great alternative to manual, and help you to raise your legs whenever you need to to reduce swelling.

NOW AVAILABLE

Q300R Kids & Teens

It's a fact of life. Kids grow. Fast. Faster than their clothes and faster than their powerchair. That's why we created the Q300 R with Kids & Teens seating systems- a set of powerchair to keep up with growing teens!

With an adjustable seating system that grows by height and width, getting older no longer means a big adjustment to a new chair. Instead, make lots of small ones and your Q300 R can be used from infant years to adulthood.

CAPSULATED JOYSTICK

Joystick not in the right position? This (optional) mounting option has 3 locking positions - including **outwards** (for getting closer to tables), **inwards** (if you have limited hand mobility) and the **standard** driving position.

STOP SWITCH FOR ADDED SAFETY

There's safety in stopping. Our added remote stop switch allows an attendant to stop a powered wheelchair via an RF remote from **up to 30 meters away**. Operating distance dependent on the environment.

SEATING

SEATING THAT GROWS WITH YOU.

Growing up doesn't mean growing out of your powerchair. We've designed the Q300 R Kids And Teens seat so you never have to fear those growth spurts. Adjustable by width (280-400 mm) and depth (360-500 mm), it's ideal for those requiring a narrow seat width, but greater adjustments to depth over time.

UNIVERSAL HEADREST
Compatible with **SEDO** and **WHITMYER** headrests, this headrest mount will help to address a range of head-support needs (from basic to multiple-point control).

Z-FINITY FOOTRESTS

Adjustable between **180 mm** above the seat pan to **480 mm** below, these footrests provide support for growing teens. Its pivot arm allows for infinite adjustment of the footrest angle and placement (for ideal positioning of the feet, ankles and knees).

SEDEO LITE DEEP CONTOUR BACKREST

Deeply-contoured for comfort, this backrest has tension-adjustable straps that can be easily adjusted to follow and support a variety of postural shapes. The deep laterals are also integrated inside the backrest, so not only will they provide constant trunk stability, they also won't move or slip over time either.

DO YOU HAVE SPECIFIC CLINICAL SEATING REQUIREMENTS?

The Q300 R Kids And Teens seat is also compatible with the **J3® Back**. Suitable for moderate-to-high positioning, the J3® Back offers the widest range of sizes, shapes and options to precisely fit and tailor your seat just to you.

C-ME

ELEVATE AND DRIVE WITH C-ME

Unfortunately, life isn't designed around the height of your powerchair. That's why C-Me allows you to elevate up to 300 mm and drive up to 4.8 kph all at the same time! Now you can keep up with your friends at eye-level and at walking speed. Reach those heights that were out of grasp. And always be seen instead of overlooked.

SUSPENSION EVEN WHEN ELEVATED

With C-Me, the suspension on your powerchair remains active even when you're elevated. So, you get the same smooth and stable ride across a variety of terrain regardless of seat level.

ELEVATE WHILST DRIVING WITH ASSIGNABLE BUTTONS

Fed up of complex joystick movements or having to stop to use your seat lift? With our patented assignable buttons, you can assign C-Me to any button to lift or descend in one simple action. It's so easy you can even do it whilst driving!

TECHNICAL DATA

Q300 R

Seat width	385 - 520 mm
Seat depth	410 - 510 mm
Seat height	410 - 490 mm
Back height	460 - 510 mm
Lower leg length	305 - 460 mm
Power tilt	0 -30°
Total width	550-580 mm
Total length	From 1060 mm
Turning circle	From 1700 mm
Maximum safe slope	6°
Maximum kerb climbing	100 mm
Maximum range (ISO 7176-4)	32 km
Product weight (with 50 Ah batteries)	124 kg
Maximum user weight	136 kg
Drive wheels	12" / 14"
Castor wheels	8" / 9"
Maximum speed	10 kph
Battery size	50 / 55 / 63 Ah
Electronics	VR2 / R-Net
Crash tested	Yes - approved for forward facing transport in a vehicle (ISO 7176-19). Attachment: 4 chair fixing points with 2 double straps rear and 2 single straps front. No anchored belt restraints allowed. The ease of access and manoeuvrability in vehicles depends on the wheelchair size.
Transport without user	Fix the wheelchair safe in the vehicle (e.g. car or plane).
Intended use and environment	For people with limited mobility, indoor and outdoor use. Wheelchair type class B
