Q300 M Mini with SEDEO PRO

THE POWER OF QUICKIE

Part of the Quickie power range

- One modular power chair family
- Simple to prescribe and match product to clinical need
- The most efficient power chair fleet on the market

Q300 M MINI DRIVE BASE

Ultra slim 520 mm compact base (with 12" wheels)

Turning circle of just 1120 mm

- go where others can't

TRUE mid-wheel drive powerchair with all wheel suspension

- Keeps you safe and stable
- Super strong 4-pole motors
- 70 mm kerbs (14" drive wheels)
- Range of 36 km with 56 Ah batteries

Proven indoor and outdoor performance!

OUTDOOR PERFORMANCE

Anti pitch technology

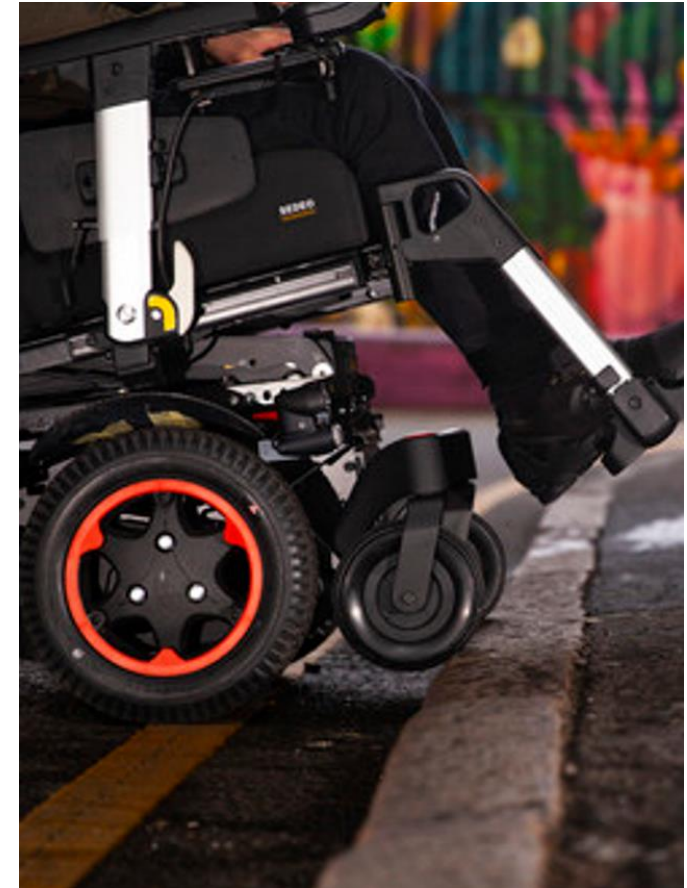

You're kept safe and stable in your seat with Anti-Pitch technology, this prevents jolting you forwards when you come to a halt on a slope.

All-wheel independent suspension

Our PATENTED all-wheel independent suspension ensures all six wheels remain on the ground whilst climbing and transitioning obstacles. Any shocks or bumps are absorbed by the wheel's suspension, providing a soft and smooth ride.

Kerb climbing capability of 70 mm

With 14" drive wheels

MOTORS

Sunrise Medical uses the industries best motors from Linix

Preserve power

Like a car on the motorway versus in the city, our motors are designed for optimal driving performance, so you get the power when you need it (and preserve it when you don't).

Power boost

Tricky incline? Our controller and motors work together to provide you with an extra 10 seconds of power boost when you need it the most.

Reduce thermal rollback

The larger motor cooling fins help heat to escape easier, reducing thermal rollback so you maintain a constant speed - even on slopes or uneven surfaces!

Designed to last

Unlike other powerchairs, our gears are polished metal (not plastic). Providing lower noise and higher efficiency, they're bred for tough conditions.

Options offered

- 2-pole standard: 6 kph
- 2-pole performance: 6 & 10 kph
- 4-pole: 6 or 8 kph
- Cross-compatibility - Q300, Q400, Q500, Q700
