

Q300[®] M Mini Teens

Imagine the Possibilities

QUICKIE Q300 M MINI TEENS

Whether it's hanging out with your friends or exploring outdoors, the Q300 M Mini Teens enables you to live your life to the fullest!

The Q300 M Mini Teens with its **520 mm** narrow base and small turning circle of **1120 mm** is made for easily moving around unhindered in tight spaces - such as small houses and class rooms - or discovering out-of-the-way corners outdoors.

Equipped with a super-strong **4-pole motor** (optional) and a range of **36 km**, you can easily keep up with your firends without worrying about being left behind due to unaccessible routes or running out of charge. And when things get a bit wild, the **all-wheel suspension** ensures a smooth and stable ride.

And with a **seating system that can be adjusted to fit a growing teenager over time**, this is a powerchair that you won't grow out of.

Scan the QR code with your phone's camera to get more information.

IMAGINE THE PLACES YOU'LL GO

Discover the world on your terms thanks to the **Q300 M Mini Teens and its mid-wheel drive technology.**

With a drive wheel that's positioned in the middle of the base, you're able to turn on the spot for great indoor manoeuvrability. Plus, as you're seated directly over the drive wheel, the positioning of your weight increases traction to provide exceptional outdoor performance too - perfect for growing children and smaller adults.

Looking for the most compact base for indoor manoeuvrability? Choose the 12" drive wheels. If you prefer better outdoor performance, go for 14"!

All-wheel independent suspension
Our PATENTED all-wheel independent suspension ensures all six wheels remain on the ground whilst climbing and transitioning obstacles. Any shocks or bumps are absorbed by the wheel's suspension, providing a soft and smooth ride.

Anti-Pitch technology
Traditionally when a powerchair comes to a halt on a slope, the stopping motion will jolt you forwards. That's a problem we've eliminated with Anti-Pitch technology - so you kept safe and stable in your seat.

Kerb climbing
The Q300 M Mini Teens with its 300 mm (12") drive wheels can handle kerbs of up to 50 mm so there's no need to take the long way round. Upgrade to 355 mm (14") drive wheels and tackle kerbs of up to 70 mm.

YOUR COMPANION THAT GROWS WITH YOU

A seating system desgined for growing Teens.

With the Q300 M Mini Teens, there's no need to worry about the cost or the change to a new chair as you get older, because the seating system has been specifically designed to accommodate users requiring narrow seat widths with long seat depths. The seating system allows to be adapted to the changing body dimensions and proportions of teens between **300 to 400 mm in width** and between **360 to 500 mm in depth**.

The **Z-Finity Footrest** is infinitely adjustable (between 160 mm above the seat pan to 480 mm below) along its rotational arc, multiple angles and placement options for positioning the feet, ankles, and knees can be achieved.

And in case you have more specific positioning requirements, the Q300 M Mini Teens is also **compatible with our JAY J3 Backs**.

Scan the QR code with your phone's camera to get more information.

SEDEO LITE Deep Contour Backrest
The SEDEO LITE Deep Contour backrest offers 140 mm lateral contour to support your trunk with soft immersive foam for comfort and mild kyphotic postures. Because the laterals are integrated, they won't move overtime so you're kept upright and supported for longer.

Powered Lift and Tilt
Reach new heights with 300 mm of seat lift and get to every-day objects that would otherwise be out of grasp. You can also transfer easier thanks to being in a higher position to stand from. Plus, with up to 50° of tilt, you can sit back and enjoy greater relaxation and pressure distribution too.

Take controls
Available with VR2 as standard, upgrade to the R-Net Advanced Joystick and enjoy a large, easy-to-read HD display, simple to control paddle switches and connectivity to the world around you.

Patented Assignable Buttons*
Change a joystick button to any command you desire thanks to our patented assignable buttons. You can also assign a second (long press) function to a button to quickly access commonly-used functions without using the joystick.

Connect to your world*
Seamlessly take control of your environment using the integrated Bluetooth and i-device functionality. Control your TV, phone and other home entertainment systems simply through your joystick.

Universal Headrest
The headrest mount on Q300 M Mini Teens is compatible with SEDEO and WHITMYER headrests, which help to address a range of needs from basic support to multiple-point control.

Capsulated Joystick
This joystick mount has three locking positions. It can be mounted mid-line for teens who have limited hand mobility and can also swing inwards/outwards to help getting closer to tables.

*Only with R-Net

ELEVATE AND DRIVE WITH C-ME

C-Me is all about seeing you, and just you!

Elevate up to 300 mm whilst travelling 4,5 km/h and move shoulder-to-shoulder with everyone around you.

Enjoy your new freedom!

Our power wheelchairs are designed with style for long-lasting performance. Unlike some of our competitors, our suspension doesn't lock out when you drive with C-Me, giving you a smooth and comfortable ride from start to finish. You can even lift or descend at the touch of a button with no need to stop while transitioning either!

Drive shoulder to shoulder

Drive at walking speed in full lift whether out with your friends at the mall or cooking at home and wanting to quick drive between each surface C-Me takes away frustrating speed restrictions allowing you to live without limits!

Scan the QR code with your phone's camera to get more information on C-Me.

BRIGHT YOUNG THING

You want to sit in style?

You will be with 12 exciting shroud designs patterns! Coordinate or contrast them with an additional seven accent colours for the wheel and casters to get the perfect mix.

Looking for something unique?

A person's individuality is as unique as their fingerprint. That is why we are also happy to design wheelchairs according to your personal wishes - like a personally designed foil wrapping. Considerably more detailed and versatile, almost any type of design can be printed onto foil and affixed to your wheelchair's frame, sideguards and even footrest.

The only limitation is your imagination

Individual wheelchair frame design foil

But there's more. Our BUILT-4-ME department has created thousands of bespoke powerchairs. When you want to break the mould, we'll help you create a truly one-of-a-kind powerchair.
